

Sydney Observatory night sky map

A map for each month of the year, to help you learn about the night sky

October 2009

www.sydneyobservatory.com.au

This star chart shows the stars and constellations visible in the night sky for Sydney, Melbourne, Brisbane, Canberra, Hobart, Adelaide and Perth for October 2009 at about 8.30 pm (summer time). For Darwin and similar locations the chart will still apply, but some stars will be lost off the southern edge while extra stars will be visible to the north. Stars down to a brightness or magnitude limit of 4.5 are shown on the star chart. To use this star chart, rotate the chart so that the direction you are facing (north, south, east or west) is shown at the bottom. The centre of the chart represents the point directly above your head, called the zenith point, and the outer circular edge represents the horizon.

Star brightness

- Zero or brighter
- 1st magnitude
- 2nd
- 3rd
- 4th

Moon phase

- Full Moon: 04th
- Last quarter: 11th
- New Moon: 18th
- First quarter: 26th

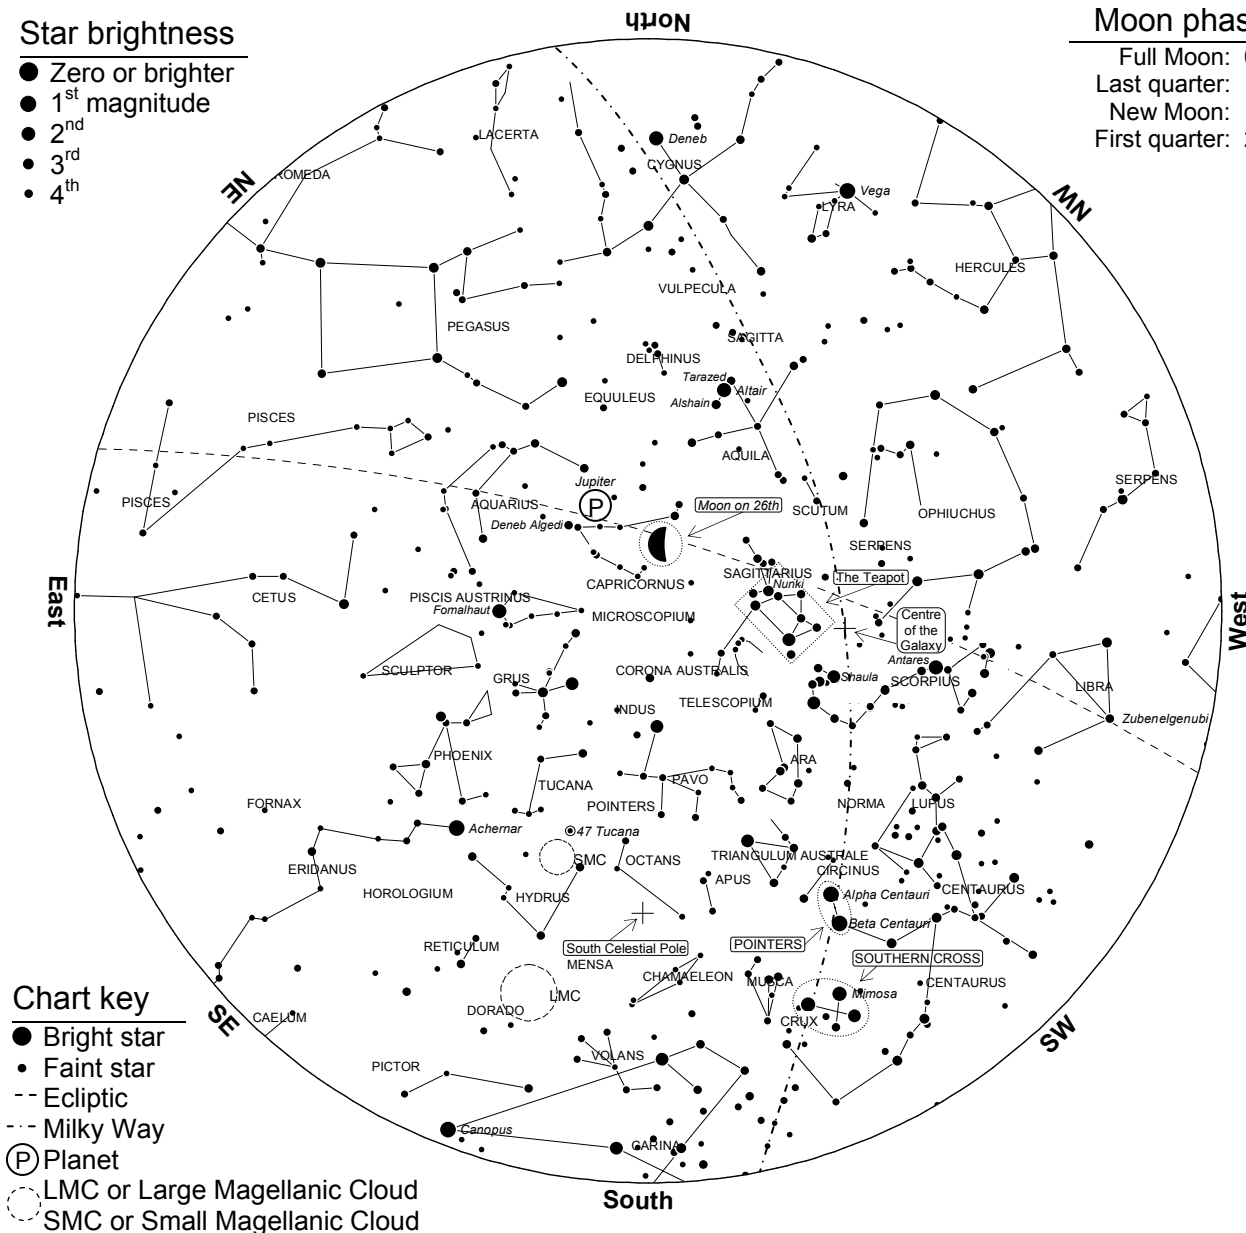

Chart key

- Bright star
- Faint star
- Ecliptic
- - - Milky Way
- (P) Planet
- LMC or Large Magellanic Cloud
- SMC or Small Magellanic Cloud

Remember summer time (daylight saving) begins on Sunday 4th at 2am in NSW, Victoria, Tasmania and SA. Jupiter remains visible in the early evenings as a bright star toward the north-east. The best time to see the Moon using binoculars or a small telescope is a few days either side of the first quarter Moon on the 26th. To the south-west is Crux (the Southern Cross) easily located using the two nearby stars called the Pointers. In the centre of the sky are the constellations of Scorpius (the Scorpion) and Sagittarius (the Archer).

Sydney Observatory, with a magnificent view overlooking Sydney Harbour, is open every day (except Christmas day and Good Friday) between 10am and 5pm and for night sessions (times vary depending on the season). View the sky nightly through one of our telescopes, and see 3D movies about the universe. Bookings are essential for night programs.

For more information, check our website at www.sydneyobservatory.com.au or call (02) 9921 3485. Sydney Observatory is at Watson Road, Observatory Hill, in the historic Rocks area of Sydney.
